

# JOSEPH FAJEN

## SENIOR TECHNICAL WRITER

Portland, OR | 530-264-6927 | joefajen@gmail.com | LinkedIn

---

### PROFESSIONAL SUMMARY

Inherently curious and collaborative Senior Technical Writer with 20+ years of experience transforming complex technical concepts into user-friendly documentation. **Expert at building relationships with developers and product teams** to create detailed, accurate documentation that directly addresses audience needs. Proven track record of leading documentation projects from concept to completion across blockchain, API, and hardware domains.

---

### CORE COMPETENCIES

- |                                               |                                               |
|-----------------------------------------------|-----------------------------------------------|
| ▸ Documentation Project Management            | ▸ API & Developer Documentation               |
| ▸ Blockchain & Smart Contract Documentation   | ▸ Hardware & Software Documentation           |
| ▸ Cross-functional Team Collaboration         | ▸ Git/GitHub & Docs-as-Code Workflows         |
| ▸ Content Strategy & Information Architecture | ▸ Technical Interview & Information Gathering |

### PROFESSIONAL EXPERIENCE

**Sr. Technical Writer, IOHK, Remote**

May 2022 – Present

#### Built the Essential Cardano AI Assistant Chatbot

- Delivered production AI chatbot end-to-end — 2,500 documents from 8 sources
- Built complete extraction pipeline and deployed professional Next.js web UI with streaming, conversation persistence, and dark mode
- Iterated 20+ system prompt versions — zero detectable hallucination, 100% fact accuracy across multiple targeted test queries
- Established Railway production infrastructure; resolved critical blockers independently — API limits, domain migrations, package conflicts
- Managed full project lifecycle solo — concept through deployment, 91 repository commits
- Test deployment: <https://powerful-motivation-production.up.railway.app/>

#### Created unified documentation site for Cardano blockchain's "Marlowe" smart contract project

- Consolidated fragmented documentation from multiple repositories into a single resource
- Designed and implemented new content structure using Docusaurus
- URL: <https://docs.marlowe.iohk.io/docs/introduction>

#### Led comprehensive reorganization of Plutus documentation site

- Conducted competitive audits to inform reorganization strategy
- Managed migration from Read the Docs to Docusaurus
- Coordinated with development, web, communications, and design teams
- URL: <https://intersectmbo.github.io/plutus/docs/>

**Created manuals for Bridge Live and Bridge NDI 3G flagship products**

- Documented complex multi-channel video systems and HD/4K conversion gateways
- Collaborated with engineering teams across multiple locations

**Developed first comprehensive REST API documentation**

- Identified documentation gaps through proactive inquiry
- Created centralized reference for previously fragmented API information

**Improved document review process**

- Implemented structured review system using Adobe Acrobat
- Advocated for proper team licensing to ensure efficient collaboration

**Produced manuals for specialized modular video products using Adobe Creative Suite**

**Previous Technical Writing Experience**

2001 – 2015

- **Contract Sr. Technical Writer, Ensemble Designs** (2008–2015): Created manuals and guides for video signal processing products
- **Technical Writing Consultant** (2008–2012): Served clients including HP and Big Sky Communications
- **Web Production Specialist, New College of California** (2005–2007): Transformed static website into dynamic database-driven site
- **Contract Sr. Technical Writer, Remend & Centrata** (2003–2004): Created online help systems, API/SDK documentation, and deployment guides
- **Principal Technical Writer, H5 Technologies** (2001–2002): Authored help system and API guide for knowledge management solution

**EDUCATION**

---

**B.A., History and Philosophy** — U.C. Davis, Davis, CA, 1989

**TECHNICAL SKILLS**
